Overview

My broad research interests concern the structural and electronic properties of two-dimensional materials such as graphene and other van der Waals materials. I am particularly interested in the engineering of quantum geometry, band topology, and correlated electronic phases by combining different materials in so-called van der Waals heterostructures. My current research focuses on moiré materials, built from stacking two-dimensional materials with a relative twist angle, such as twisted transition-metal dichalcogenide bilayers, and the effect of electron-electron interactions on the low-energy moiré bands.

Research Highlight

Christophe De Beule, Robin Smeyers, Wilson Nieto Luna, E. J. Mele, and Lucian Covaci, *Elastic screening of pseudo gauge fields in graphene*, *Phys. Rev. Lett.* **134**, 046404 (2025). Awarded best poster on fundamentals at Graphene Week 2024.

Pseudomagnetic fields in strained 2D materials are “screened” by optical lattice displacements. Our theory resolves discrepancies between continuum elasticity and molecular dynamics, and shows that elastic screening can drastically change the electronic properties of corrugated graphene.

Education

- | | |
|-------------|--|
| 2012 – 2017 | PhD Physics , <i>Felicitations of the jury</i> , Condensed Matter Theory group at the University of Antwerp (Belgium), Award date: 23 Nov 2017. |
| 2010 – 2012 | MSc Physics , <i>Greatest distinction</i> , University of Antwerp (Belgium). |
| 2007 – 2010 | BSc Physics , <i>Great distinction</i> , University of Antwerp (Belgium). |

Research Experience

- | | |
|-------------------|--|
| 05.2025 – present | Researcher , <i>University of Antwerp (Belgium)</i> , CMT group . |
| 03.2022 – 04.2025 | Postdoc , <i>University of Pennsylvania (USA)</i> , Group of Eugene Mele , First year supported by an INTER Mobility grant of the Luxembourg National Research Fund. |
| 10.2020 – 02.2022 | Postdoc , <i>University of Luxembourg (Luxembourg)</i> , Group of Thomas Schmidt . |
| 04.2018 – 09.2020 | Postdoc , <i>Technical University of Braunschweig (Germany)</i> , Group of Patrick Recher . |
| 2012 – 2017 | PhD Student , <i>University of Antwerp (Belgium)</i> , CMT group , Supported by PhD fellowship of Research Foundation Flanders (most prestigious PhD fellowship in Flanders). |

Publications

- 17 first-author publications;
- 4 papers published in PRL (one featured on the cover), 1 paper published in PNAS, 3 under review at PRL, and one under review at Nature Physics.

PREPRINTS

- [28] **Christophe De Beule**, Liangtao Peng, E. J. Mele, and Shaffique Adam. *Role of electron-electron interactions in M -valley twisted transition metal dichalcogenides*, UNDER REVIEW AT PHYS. REV. X. arXiv: [2508.14283](#).

Invited talks

Mar 2026 APS Global Physics Summit 2026 (USA), *Invited Speaker Invitation*.
Lattice relaxation in moiré materials

Sep 2025	Delft University of Technology (Netherlands), <i>Invited by Anton Akhmerov.</i> Elastic screening of pseudogauge fields in graphene
Aug 2025	University of Regensburg (Germany), <i>Invited by Klaus Richter.</i> Elastic screening of pseudogauge fields in graphene
Jun 2025	National Taiwan University (Taiwan), <i>Invited by Yang-Hao Chan and Guang-Yu Guo.</i> Lattice relaxation, soliton networks, and domain-wall modes in bilayer moirés
Jun 2025	Institute of Physics, Academia Sinica (Taiwan), <i>Invited by Chen-Hsuan Hsu.</i> Lattice relaxation, soliton networks, and domain-wall modes in bilayer moirés
Apr 2025	Washington University in St. Louis (USA), <i>Invited by Shaffique Adam.</i> Lattice relaxation, soliton networks, and pseudogauge fields in bilayer moirés
Apr 2025	Rutgers University (USA), <i>Invited by Eva Y. Andrei.</i> Lattice relaxation, soliton networks, and pseudogauge fields in bilayer moirés
March 2025	Flatiron Institute (USA), <i>Invited by Valentin Crépel and Nicolás Morales-Durán.</i> Lattice relaxation in homobilayer twist moirés
Jan 2025	National Cheng Kung University (Taiwan), <i>Invited by Ming-Hao Liu.</i> Lattice relaxation in homobilayer twist moirés
Aug 2024	Drexel University (USA), <i>Invited by Jörn Venderbos.</i> Current state-of-the art in moiré transition metal dichalcogenides
Aug 2023	University of Antwerp (Belgium), <i>Invited by Bart Partoens.</i> Topological Andreev rectification
Aug 2023	University of Luxembourg (Luxembourg), <i>Invited by Thomas Schmidt.</i> Berry curvature spectroscopy from Bloch oscillations
May 2020	University of Luxembourg (Luxembourg), <i>Invited by Thomas Schmidt.</i> Valley chiral networks in minimally twisted bilayer graphene
Jan 2020	National Cheng Kung University (Taiwan), <i>Invited by Ming-Hao Liu.</i> Electronic transport in twisted bilayer graphene
Aug 2019	KU Leuven (Belgium), <i>Invited by Dr. Kristof Moors.</i> Valley splitter and transverse valley focusing in twisted bilayer graphene
Feb 2018	TU Dresden (Germany), <i>Invited by Dr. Tobias Meng.</i> Topological crystalline states at the interface of two topological insulators
Feb 2018	TU Braunschweig (Germany), <i>Invited by Prof. Patrik Recher.</i> Topological crystalline states at the interface of two topological insulators

Teaching Experience

2020 and 2024	Introduction to Wolfram Mathematica , <i>Theory and exercises</i> , Course written and initiated by me, TU Braunschweig (2020) and UPenn (2024).
2020	Topological Systems and Quantum Computation , <i>Exercises</i> , Prof. Patrik Recher, TU Braunschweig.
2019	Dynamics of Fermi liquids in one dimension , <i>Exercises</i> , Prof. Patrik Recher, TU Braunschweig.
2014 – 2015	Advanced Quantum Mechanics , <i>Exercises and contributed to theory course</i> , Prof. Bart Partoens, University of Antwerp.

- 2014 **Analytical Mechanics**, *Exercises and co-developed theory course*, Prof. Bart Partoens, University of Antwerp.
- 2013 – 2014 **Computer Lab**, *Tutoring and managing of student programming projects in MATLAB*, University of Antwerp.

Supervision and mentoring

- 2024 **Mohammed M. Al Ezzi**, *PhD student*, Group of Prof. Shaffique Adam, National University of Singapore.
- 2024 – 2025 **Robin Smeyers**, *PhD student*, CMT group, University of Antwerp.
- 2023 – 2025 **Steven Gassner**, *PhD student*, University of Pennsylvania.
- 2018 – 2021 **Patrick Wittig**, *PhD student*, University of Braunschweig.
- 2018 – 2020 **Lena Bittermann**, *PhD student*, University of Braunschweig.
- 2015 **Timo Kerremans**, *Bachelor student*, University of Antwerp.

Institutional responsibilities

- 2024 – 2025 **Organization of weekly group meetings and invited talks**, UPenn.
- 2012 – 2016 **Organization of Physics Colloquia (EPS Young Minds)**, *University of Antwerp*.
